

From the Publisher ... A little light on DX loggings this week, but with Bill Hale's GYDXA-1240, we're actually a bit "tight" this week!

Don't forget to check http://www.dxtests.info/ podcasts/ for new updates; #8 is now available, and more continue to be added periodically.

e-DXN stats ... 151 members, only 19 of whom have paid and never registered, which still is a mystery to me (except in one case, perhaps, a gift from one DX'er to another). I continue to nuke and block spammers, as many as a half-dozen or more a day; if you have a problem accessing the site, please e-mail me immediately, as it's possible that I could have blocked your IP address whilst battling the Ukranian spammers.

Unfilled positions ... We're still in need of volunteers for the following positions, as described in detail in V73, #27, the June '06 DXN: A person proficient with phpBB to maintain the e-DXN site; one or more additional moderators for e-DXN; one or more persons to edit future NRC publications;

HEAR AND THAR

□ Reported as Silent: WDSP-1280 Defuniak Springs, Florida,

□ A reminder about the 'new' rules for Graveyard DX records. A record can be held by a Canadian, as well as an American DXer. One of each only. Let's say you DX from, say . . . North Carolina and hear a station in Wisconsin at a distance of 652 miles. And the records for that station are 796 miles for the U.S. record and 380 miles for the record from Canada. Well, that was a nice catch, but you'd have to best 796 miles to beat out the U.S. record. Hope that explains how it works. □ Thanks to **Wayne Heinen**, and with the help of all those dismissals, we made a full page + this week.

FROM THE VAST WESTLAND

- ▲ There is sad news to report on the Super Bowl front this week, and not just because your editor's beloved Packers were eliminated from their quest for it. Long-time readers of this column will recall how for the past few years we have detailed the futility of Vast Westland teams to win championships in two sports: NFL football and NCAA basketball. On Sunday 1/20, Eastern Time teams New England and the New York Giants beat Vast Westland teams San Diego and Green Bay, setting up an all-ELT Super Bowl match-up. No suspense this time around-- an Eastern Time team will win the Super Bowl for the *eighth* consecutive year! (By the time you read this, which one it is may have already been decided.) We will have to wait until March Madness to see if this is the year the other string (ELT teams have won ten straight NCAA basketball championships!) will end.
- ▲ Thanks to our great group of Denver area reporters, DDXD-W readers have been kept up-to-speed on the Denver IBOC situation, quite possibly the most challenging one in all of North America for DXers. This week Chris Knight sends along these observations: "I did a daytime IBOC scan here

in metro Denver and noted 16 stations carrying IBOC.... As a result, there is noise all over the AM band on all unoccupied frequencies during daylight hours. The Denver dial sounds "third world." For example: the Denver Airport TIS is overcome with 560 KLZ IBOC (which is particularly sloppy); 850 KOA's IBOC is audible under 870 KJMP within 10 miles of KJMP's transmitter; 1490 KCFC's IBOC is audible on 1510 KCKK within 10 miles west of KCKK's transmitter and when driving through underpasses at closer distances." And Chris adds: "It seems to me the FCC set up the Denver metro area as their showcase. The FCC granted power increases to stations within 20 kHz of semi-locals running IBOC: 1360 KHNC (1340 KCFR runs IBOC), 1060 KRCN (1040 KCBR runs IBOC), 1510 KCKK (1490 KCFC runs IBOC) plus others. KCKK was also granted a transmitter site move from south of Littleton to Thornton 20 miles to the north. This puts their transmitter site 25 miles away from KCFC 1490 in Boulder, but they still suffer IBOC interference from KCFC outside of their lobes."

Steve Sprague reports he is "...getting some new ones on a CCRadio-SW with Select-a-Tenna." Chris Knight tells us that he has started experimenting with some backyard antennas. Says Chris, "So far just one antenna is up, the terminated loop. One end is fixed, but the other end is portable 90 degrees from SE to SW. The terminated end has a variable resistor. I use wireless headphones and listen while making adjustments to the variable resistor, then come inside where it's warm... hi." Steve and Chris are part of a double-digit turnout of reporters this week, together using a wide variety of receivers and antennas to pull in those logs. And of course, doing their listening inside where it *is* warm! Thank you all. 73 Bill

1560	WMBH	MO Joplin. (John Tudenham has kept us posted on this often-silent station in past DDXD-W columns, and updates us on the situation in this one. EdWI)
		Now running the transmitter off a generator as power company shut the sta-
		tion off for non-payment. No regular hours usually on from about 8 AM
		to shortly after sunset, sometimes off in middle of the day if out of gas. Just
		urban music from CDs with few adds or voice IDs. Noticed lately on 1560 we
		get strong signals by skywave from 50-kw KGOW 1560 in Bellaire TX before
		and after sunset and sunrise. A friend in Carthage MO 15 miles from Joplin
		tells me KGOW often takes out WMBH when WMBH is on its 250-watt day
		power. (JRT-MO)
