*From the Publisher* ... We're packing and getting ready for the NRC Convention in Pittsburgh, August 29-31. Will we see you there? Will I have to indulge in some smack-down bidding on mugs?

John Malicky says that the KDKA tour just isn't going to happen, because of construction at the station, but that the Channel 11 (WPXI) tour is still planned to start at 2:30 Friday; check with John when you arrive for the exact time and place to gather for departure to the tour.

*DXChange* ... Harry Schools - 2511 South 20th St., Third Floor, Philadelphia, PA 19145-4205 is looking for complete years sets of *DX News* and

50 years ago ... (Oops! Somehow I've misplaced Kermit Geary's files for this column. I'll keep looking for them ...)

25 years ago ... from the August 29, 1983 DXN: Gene Martin, Denver, CO, suggested that eastern DX'ers who wanted to hear something from down under to monitor 1476, 1566, and 1575 at the appropriate hours, noting that small Anzac stations come to Denver just before dawn on summer mornings and might go further east during early fall.

10 years ago ... from the August 17, 1998 DXN: Musing editor Dave Schmidt noted that he was now located in the Scranton/Wilkes-Barre area "with a real engineering type job". *DX Monitor;* he'll play a fair price and shipping. No specific dates mentioned; contact Harry for details.

**Unfilled positions** ... We're still in need of volunteers for the following positions: a DXN publisher, ASAP; a DDXD-West editor by January 1 or so; replacement editors for languished columns ("The Answerman", "Memory Dredging", "College Sports"), and one or more persons to edit future NRC publications developed by contributors or the club.

### HEAR AND THAR

□ Returning to the airwaves: WASG-550 Atmore, Alabama with religion; WSEV-930 Sevierville, Tennessee; WOAP-1080 Owosso, Michigan with religion // WCAR; WZFG-1100 Dilworth, Minnesota; KETX-1440 Livingston, Texas with country // KETX-FM; WKFO-1600 Corbin, Kentucky with talk;

□ But reported as OFF the AIR: WCTN-950 Potomac-Cabin John, Maryland per a report in DCRTV. "The 'transmitter blew up" the week of 7/20; WDLM-960 East Moline, Illinois; WIXE-1190 Monroe, North Carolina; WMJQ-1240 Cross City, Florida; KRBI-1310 St. Peter, Minnesota; KOLE-1340 Port Arthur, Texas; WSYA-1490 Anniston, Alabama; KWUD-1490 Woodville, Texas; WTTN-1580 Watertown, Wisconsin noted off the air on 8/5. The station has a construction permit to move to Columbus, but it's unknown if this silence is related to the CP.

□ Reconstruction of KFI's fallen tower began Monday with the move-on of equipment and tower hardware, according to a report by Dino at k6rix that was included in the Robert Gonsett Report. The original replacement tower fell during construction on March 18, 2008 when an elevated guy anchor gave way. "Tower sections are being assembled as additional hardware arrives this week," reports Dino. "A complete redesign of the north/east elevated guy anchor [point of failure on March 18, 2008] has been employed and stacking of tower sections should begin by the end of the week. The tower, when constructed, will be 684' tall with a 50' diameter top hat for capacitive loading

(to make the tower think it is a bit taller electrically). This new tower replaces the original 750' tall tower that was destroyed in 2004 when a light aircraft crashed into it." Check out Dino's Web site at: http://www.k6rix.com/kfi.html.

**FINES**: \$9000 to KLCN-910 Blytheville, Arkansas for public file violations; \$14,400 to East Baton Rouge Parish School Board, licensee KBRH-1260 (and WBRH-FM) Baton Rouge, Louisiana for willful and repeated violation of Section 73.3537 of the Commission's Rules by failing to properly maintain a public file for each station; \$1500 to WAMV-1420 Amherst, Virginia for filing their renewal application late; \$4800 to WILA-1580 Danville, Virginia for failure to file for renewal in a timely manner and subsequent unlawful operation.

□ KONP-1450 Port Angeles now 'translates' on K271AZ-102.1, with a number of Victoria, British Colombia listeners reporting good reception of the 70 Watt station across the Strait of Juan de Fuca. That span is 30+ miles.

□ *Radio Netherlands* Needs Your Help — Radio Netherlands Worldwide is creating a digital Historical Audio Archive of the Dutch foreign-service broadcaster's output. According to a post on the RNW "Media Network" blog, RNW is looking for copies of programs from the 1940s and 1950s distributed in North America on 16-inch discs by the Netherlands Information Bureau in New York. The discs were produced in the United States and / or Canada, and few made their way back to the archives. RNW hopes to find copies of the discs so that they can be digitized and preserved. If any of these discs are gathering dust in a record library, RNW hopes the owners will contact the Historical Audio Archive project. Internet-connected? ## Committee Announces New Ultralight MWDXing Awards Program By John Bryant

The Ultralight DXing Awards Committee is pleased to announce a new and on-going Awards Program for the Ultralight MW DXing Community. The Program is unique in several respects; first, it is the only Awards Program that is restricted to MW DXing accomplishments achieved with commonly available, inexpensive, entertainment-grade "Ultralight" pocket radios. Secondly, the program is totally web-based. Applications for awards are accepted by e-mail only and award certificates that are suitable for framing are distributed to the recipients as printable digital image files. Thirdly, these certificates feature digitally re-mastered images of some of the most remarkable radio art from the first decade of broadcast radio.

The comprehensive Ultralight DX Awards Program features awards at various levels for Stations Heard, U.S. States Heard, Canadian Provinces Heard, Latin American Stations Heard, Trans-Atlantic Stations Heard, Trans-Pacific Stations Heard, Countries Heard and Continents Heard. In each category, when a DXer reaches *beyond* what is normally considered high achievement, special "Master DXer" certificates are awarded; for instance, in the Stations Heard category, certificates are available for stations heard at the 100, 200, 300, etc. station levels. At 500 stations heard on an Ultralight receiver, an extraordinary achievement, a "Master Ultralight DXer Award" is conferred.

A complete description of the Ultralight DX Awards Program is available for download from the Ultralight Files area at or directly from Rob Ross of the Awards Committee at va3sw@rogers.com

If you have yet to experience the renewed thrill of DXing with an inexpensive Ultralight receiver, we invite you to share the excitement and satisfaction that comes from success in pocket radio DX. Emphasizing DXing skill and knowledge over equipment innovation, Ultralight Radio DXing brings special rewards in proportion to the special challenges-- and has restored the original thrill of AM DXing to many radio enthusiasts. The Ultralight Files area of dxer.ca has an extensive set of information and resources on the many aspects of Ultralight Radios, and enthusiasts' activities. We hope you will accept the challenge, join in the fun, and share in the rewards!

### DDXD-West

FROM THE VAST WESTLAND

- ▲ It is hard to believe that another volume of *DX News* comes to an end with this issue! I would like to take this opportunity to thank all the great DXers who continue to support DDXD-West through their loggings and station news, and through their e-mails and letters of encouragement. I am also informing the membership that I will be giving up my editorship early next year, with my last column appearing in *DXN* #76-15, publication date 1/12/09. It has been a great last four years, but it is time to move on and give others a chance. I hope that there is great interest in taking over this column, and look forward to working with the next editor to make the transition a smooth one. In the meantime, please keep those loggings coming in.
- ▲ John Wilkins checks in with another of his periodic reports on the HD radio scene in the IBOC-saturated Denver market. Says John in an 8/6 e-mail: "Local IBOCs continue to be on again, off again (mostly on). KKFN 950's IBOC has been off for several days; KDDZ 1690 seems to be running IBOC days only; KEPN 1600's IBOC is off most of the time; KOA 850's IBOC is back on after being off for many weeks. KPOF 910 and KLTT 670 are the only local stations whose IBOCs I have never noted off. All of this could change by the next issue." Indeed it could, John, indeed it could!
- We have a l-o-n-g six-week interval between the last issue of Volume 75 and the first issue of Volume 76. Right in the middle of this DXN downtime is the long-anticipated 75<sup>th</sup> Anniversary NRC convention in Pittsburgh, 8/29 through 8/31. I will be there (wouldn't miss it!) and look forward to getting together with many of you. See you then! 73 Bill

### Station News

**KIPA** HI Hilo. Added Kim Komando per show 6/28, though hard to confirm since the 620 station had been off the air since April! However, station was noted while in the car in East Honolulu back on after three months at 7/11 2024 ELT with Big Island ads, "Lava 1-Oh-5-Point-3 weather" (volcano eruption haze as usual), outro "Let's get back to the greatest hits of all time on Lava 1-Oh-5-Point-3," BTO's "You Ain't Seen Nothin' Yet" and other hits from the mid-60s to early-80s." Later heard 7/18 1559 with ad for document shredding service, liner "The All New 62...'The Sean Hannity Show' next on the All New 62...," delayed ABC news. Per phone call to GM 7/23, station has been testing with 250 watts power (electricity is very expensive on the Big Island) with talk format weekdays and relays of KBGX-FM "Lava 105.3" oldies weekends but will officially launch with talk "sometime next week." He says all three towers (the main one in Hilo and the two synchronous ones on the West Side) are being used and will broadcast with 10 kW. He was surprised the station

### Team Effort ...

That's what makes the NRC so great! And all information, contributions, and editing for DX News, DX Audio Service e-DXN, and all publications is done by unpaid volunteers as part of a team. Perhaps you have a little time to give to your club ... if so, please write to John D. Bowker - P. O. Box 5192 - Sun City Center FL 33571-5192, and let him know what talents and time you can offer to the club.Updates to the NRC AM Log are always needed. Why not write to John today?! International

Network listings for team sports stations

The first National Football League (NFL) pre-season has begun. I need flagship and announcer information, expecially if it has changed from last season. And I also need URLs to network lists. I have received a list of the Notre Dame football network. As I have stated before, I only handle professional sports networks. I do not handle college sports networks, even if the players are essentially non-paied professionals. I do not know who handles college networks. (No one, Barry - just another opportunity for someone to take advantage of and volunteer for! -pls.)

### DX'ing 'smart', with shared tips and information from NRC members

Welcome to Target DX Column number 4. Contributor this time: Sheryl Paszkiewicz Manitowoc WI

This month we will look at Sun Rise Skip (SRS) and Sun Set Skip (SSS) targeting. Both SRS and SSS are a form of Greyline DX'ing. Once again I will base my ideas and thoughts on my DX experiences here in Winnipeg MB so please adjust for your location.

Greyline DX'ing is like surfing a big wave that is going around the world. At any giving time of day there are two Greylines on the face of the planet. One is a sun rise line and the other is a sun set line. As these Greylines move across the world they cause an enhancement for DX'ers. For this column we will look primarily at SRS and SSS for North America. However do not forget the Greyline enhancement can help with Trans Atlantic and Trans Pacific DX.

Here are two sites you can go to in order to see the Greyline in action: http://www.fourmilab.ch/ cgi-bin/uncgi/Earth/action?opt=-p, and http://www.daylightmap.com/index.php. You can click on the map to make it zoom in on your part of the world for a better view of the Greyline.

You can down load The GeoClock Greyline program for your computer at: http://geoclock.home. att.net/

The above sites will show you the Greyline as it moves around the world on 5 minute updates. Also of use is the Sunrise-Sunset Tables offered at the NRC Publications site. These will give you a month by month view of where sun rise and sun set is in North America.

Based on my DX experiences here in Winnipeg MB SSS is a double edged sword. Before my sunset there is a better chance to receive targets to the East of me. As the sun moves and it is at or just before sunset causing the Greyline to be on my location there is an enhancement of signals to the East. I won't get too technical but this has to do with how the D layer of the atmosphere works but here it is quickly. During the daylight hours, the D layer of the ionosphere is ionized by radiation from the sun, and effectively becomes an absorber of energy (radio signals). The D layer prevents the long distance signals that you may have targeted from being able to bounce off of higher layers, and travel further. When the sun sets, the D layer looses its absorbing properties. At the same time, desired radio signals can bounce longer distances. To sum up this D layer movement causes interesting but brief DX conditions.

Many stations are still on full day time power and are easier to hear before they power down for the night. They may also be on a more non-directional antenna pattern during day time hours putting more signals my way. The other edge of the sword is as they approach sunset they may change pattern more to my location to protect other stations on the frequency. This can wipe out some other stations on the frequency. The stations may also be powering down causing them to disappear once they change to a lower power. There is that in between time right at Greyline where stations are in a state of flux both for power and for direction that can provide you a chance to grab some targets.

In the morning SRS works like SSS but in the opposite direction. Here in Manitoba we get an enhancement to the West at SRS Greyline. There are many stations to the West of Winnipeg that are only heard at or just past SRS. If I want to catch a new target I often use SRS to listen for the western targets I have on my target sheet. Stations to the east are heard less often or are weaker at SRS so the stations to the West are enhanced and come in better. The stations are heard further and further West as sunrise approaches and passes over Winnipeg. In winter it is not uncommon to DX to the West for an hour or more after my local sunrise. Also SRS is the only time of the day I have gotten any Trans Pacific DX so all those targets are SRS targets only.

As stated above stations have to adjust their powers and patterns at both SSS and SRS if they are required to do so by their license. These times are basically set by the sun rise or sun set time of the middle of the month. As the month goes on the sun set and sun rise times are a bit skewed. These last few days of the month can provide further enhancement for Target chasing. This takes some getting used to and don't expect to get a bunch of new catches on your first couple of tries. This is a game of the three "P's". That is to say Patience, Propagation conditions and just being in the right Place at the right time.

Here is our very first Target List from Sheryl Paszkiewicz in Manitowoc WI: 540 NM Las Vegas KNMX when Milwaukee and Regina aren't audible 560 ON Owen Sound CFOS when WIND isn't audible 660 AZ Window Rock KTNN when WFAN isn't audible

690 New Orleans or Jacksonville when Canada isn't in

710 ON Niagara Falls CJRN when WOR isn't dominant

810 MS Magee WSJC instead of WGY

940 GA Macon WMAC instead of Canada

Sheryl has heard all of these at one time or another, but wishes she could hear Maine on 1160 instead of Chicago!! She can't even hear KSL anymore. Anyone have a tip for Sheryl on getting Maine from her location in WI?

As the editor I hope to see more listings in the future, so we can grow the column into a useful tool for all the readers. The list would be a way to let fellow DX'ers know that if they are hearing a certain station they could be trying for others in that area of the country. Or as per Sheryl's list above if you are not hearing certain stations there other stations to be heard on that frequency.

My personal Target Sheet is at http://www.angelfire.com/mb/amandx/Targetsheet.xls 73 for this time Shawn
