From the Publisher ... Former NRC (and several other clubs) member Ray Baurenhuber passed away September 25 after a heart attack, according to his niece. Our sincerest sympathies to his family.

KFI-640 returned to its full 50 kW and with its new tower on September 25; many DX'ers in the western U. S. have reported increased reception of the pioneer station after they "flipped the switch."

Barry S. Finkel, Professional Sports Networks column editor says, "The National Hockey League pre-season has begun; please send me any information for NHL flagships, networks, and announcers." Don't forget to send network information for your local college sports nets to new College Sports Network editor John Cereghin, also.

Unfilled positions ... We're still in need of volunteers for the following positions: someone familiar with phpBB to work with e-DXN maintainance; a DXN publisher, ASAP; a DDXD-West editor by January 1 or so; replacement editors for languished columns ("The Answerman" and "Memory Dredging"), and one or more persons to edit future NRC publications developed by contributors or the club. Training is available, and I'll see if I can't work you into the schedule for use of the corporate jet, too ...

"The Mexican stations are notified to and accepted for nighttime operation with power levels limited to 1.0 kW.However, both stations appear to be operating with a nighttime power level on the order of 50 kW. Mitigation efforts of both the FCC and KSKY(AM) with the Mexican government and the offending stations have been unsuccessful.Therefore, the applicant herein seeks extraordinary relief from the interference by proposing to re-transmit the KSKY(AM) programming on three low power FM repeaters throughout the KSKY(AM) nighttime loss area to restore lost KSKY(AM) service to the public."One station is on 92.9 in the Dallas area; one station is on 95.5 located northeast of downtown Fort Worth; and one station is on 92.1 in Arlington.

APPLICATIONS

1220 WGNY NY Newburgh - Applies for U4 10000/180.

1540 WSIV NY East Syracuse - Licensed for **U1 1000/57**, WSIV applies to move to the #2 tower of WOLF-1490's 2-tower array as U1 1000/57 CH 1000, adding the CH designation.WOLF has a pending application to go U1, using tower #1 only. That would leave tower #2 'vacant' and available for WSIV's use.Tower #1 is also being proposed as the daytime tower for the new WVOA-720 Dewitt, New York, di-plexed with WOLF.

AMENDMENTS TO APPLICATIONS

1360

NEW

CA Santa Maria - Initial application was for U1 1000/1000 on 1330. This amendment requests U4 2000/2000 on 1360.

DDXD-West

FROM THE VAST WESTLAND

- October is here-- this DXer's favorite month! It is the one month when perfect atmospheric conditions (to make life pleasant) and perfect ionospheric conditions (to make radio great) combine. Ahhh-- watching great catches on the gridiron, getting great catches on the radio; raking leaves in the daytime, raking in stations at night-- you just can't get much better than this!
- We were part of a wide-spread power outage in Madison on the night of 9/20 which lasted a good 1-1/2 to 2 hours. When the power went off, I instinctively grabbed the trusty GE SRIII, as always loaded with fresh batteries for just such occasions. From a QRM standpoint, it was like turning back the clock many years-- so quiet and clean, no noise, no buzz. When the power came back on, the difference was instantly, dramatically noticeable. What great "progress" the age of electronic gadgetry has brought!
- You can tell that we are on the late summer/early fall timeline. **Neil Kazaross** has checked in with some amazing stuff captured by his phased BOG system, this time from his home in Barrington IL. Kaz drops this note along with his loggings: "If I can catch new WPPI 1010 and a few needed graveyarders I will have Minnesota completed here on AM." Gopher it, Kaz! Read his three new Minnesota AM logs in the "Regular Loggings" section below. By the way, as **Bill Hale** reports in this week's AMS, WPPI is a new station that has just gone on the air. So, it is just a matter of time before Kaz adds this one to his logbook.

A reminder: there will be no DDXD-West in DXN issue #76-3 next week. We will catch up in #76-4.

Also, *PLEASE* get your e-mailed loggings into me by Thursday at 1300 ELT if you expect them to appear in the next published issue. Any late submissions will have to wait until the following issue. Due to personal circumstances I can only spend a minimum amount of time on Friday meeting the deadline that I must meet. Finally, as announced in previous issues I will be leaving the DDXD-W editorship at the end of 2008. Interested in taking over? Want to talk about it? Drop me a line. CUN14! **73 Bill**

- **TX Beaumont.** Things are slowly returning to normal along the Gulf Coast of Texas in the aftermath of Hurricane Ike's landfall 9/12. In a 9/21 posting on the NRC list **Scott Fybush** reported on the woes that KLVI faced following Ike's visit: "...it got good and flooded out-- water up to three feet deep across some of the site, and nearly two feet in the transmitter building. That delayed access to the site, and for a few days KLVI was operating at reduced power from a 1 kW transmitter and short whip antenna at an alternate site." Scott went on to say that the station returned to full power at its licensed site on 9/21. Then on 9/23 Willis Monk on the IRCA list reported a rare mid-evening logging of the station at his listening post in Old Fort TN. This prompted **Glenn Hauser** to speculate that the station, normally U2 5000/5000, was temporarily running non-directional nights "...in order to get back on the air ASAP." The next night I tuned in to 560 and found KLVI making a very rare evening appearance here (see "Regular Loggings" below). **(Ed.-WI)**

Heard with "Motorcycle World, " followed at 2100 by ABC news then "The Allen Hunt Show." However on 9/20 I heard Kim Komando in the 1907-2100 timeslot. Incidentally, station adds Doug Stephan's "Good Day USA" per Radio-Info.com. (DP-HI*)
 - **KSKY TX Balch Springs.** Added Salem's Mike Gallagher weekdays at 0706-1000 and Dial Global's Neal Boortz at 1006-1200 9/15 per Radio-Info.com. (**DP-HI**)
- 670 KMZQ NV Las Vegas. Per Radio-Info.com, station signed on (see last week's AMS #76-1 Ed.-WI) with less than its authorized day power of 30 kw (600 watts night). Format is classic hits (rock of the '70s and '80s) and is partly relayed on sister station KMZQ-FM 99.3 in Payson AZ. Slogan is "The Q." (DP-HI)
- **790 KBME TX Houston.** In the same post as KLVI 560 above, Scott Fybush revealed that KBME also had difficulties following Hurricane Ike, and at the time of the post was operating on generator power at its transmitter site. No word as of

I have heard it use the slogans "Cool Oldies 1430 AM," "the new KZQZ" and, during its legal ID, "Your First Amendment Station." For now the new format is on at 8-10 AM and 3 PM-12 midnight weekdays and all day on the weekends, with "Legends 1680" filling the rest of the time. Within a couple of months the SS format will be full-time, according to the <i>Fresno Bee</i> . 960	KFLN	MT	Baker. 9/24 2138. Good atop KMA and just prior to CFAC fading in well.

New Sunspot

Spaceweather.com, September 22.For the first time in months, a significant sunspot is emerging on the sun.It is a fast-growing active region with two dark cores, each larger than Earth.The magnetic polarity of the sunspot identifies it as a member of new Sunspot Cycle 24.Because the year 2008 has brought so many blank suns, some observers have wondered if we are ever going to climb out of the ongoing deep solar minimum.The new sunspot is an encouraging sign that the 11-year solar cycle is indeed progressing, albeit slowly.

MICHIGAN WOLVERINES

Unfortunately, all I have is the 2006-2007 affiliate list. I don't want to post a list that is more than a year old.Does anyone have anything more recent?

All I can find is a station map with calls and locations but no frequencies.Unfortunately, I don't have the time to manually look up the frequencies for about 50 stations. Whoever put this "affiliate map" together obviously wasn't thinking that the average listener wasn't going to put forth that kind of effort, either! If anyone has the actual list, please send it in!
