Published by The Institute of Radio Engineers, Inc.
1 East 79th Street, New York 21, N.Y.
The Institute of Radio Engineers issues three technical publications in the field of communications and electronics: Proceedings of the I.R.E., the regular monthly journal of the Institute; Transactions of the I.R.E., published by specialized IRE Professional Groups in each of fifteen branches of the electronic field; Convention Record of the I.R.E., an annual publication containing all available papers presented annually at the IRE National Convention.

This Cumulative Index, divided into three parts, encompasses all material published in Proceedings, Transactions, and the Convention Record for the years 1948 through 1953.

Part I contains a cumulative index of all Proceedings published from 1948 through 1953, with the contents of each issue chronologically arranged, an alphabetical authors list, and all subjects listed alphabetically and cross-indexed.

Part II contains a complete index of all Transactions published by IRE Professional Groups since the appearance of the first one in 1951, through 1953. It encompasses a combined alphabetical authors list for all Groups, and an individual contents list and alphabetical index to subjects for each Professional Group.

Part III contains the index of the first volume of the Convention Record, published in ten parts in 1953. It gives the contents of each part, and contains a complete alphabetical list of authors and subjects. The subject list also is cross-indexed.

Copies of this six-year index may be purchased from The Institute of Radio Engineers, 1 East 79 Street, New York 21, N.Y., at $1.00 per copy to IRE members and $3.00 per copy to nonmembers. Cumulative indexes to Proceedings of the I.R.E. for 1913-1942 and 1943-1947 are available at $1.50 each.
