

75¢ PUBLISHED BI-MONTHLY

RADIO-TV EXPERIMENTER

WHITE'S RADIO LOG
AM-FM-TV STATIONS
NEW EXPANDED
WORLD-WIDE
SHORT-WAVE LISTINGS!

FEBRUARY-MARCH

28 HOTTEST NEW KITS FOR '64!

**NEW FCC Rulings
on Taxes, Licensing!**

**PLANS FOR 10
PROJECTS, including--**

- \$1 BROADCAST BAND BOOSTER!**
- \$15 LIGHT METER CALIBRATOR!**
- \$7.50 POWER TOOL SPEED CONTROLLER!**

**\$10 FM TRANSMITTER
100 USES! BUILD IT IN 4 HOURS!**

**COMPLETE
PLANS!**

creased listings due to the growth of VHF and UHF television and FM broadcasting have made it an almost impossible task to present the complete *Log* every two months with the listing accuracy demanded by the users. Add to these listings, stations located in Canada, Mexico and West Indies, and you can begin to imagine the enormous task it is to assemble *White's Radio Log*. To further increase the scope of the *Log*, the Short-Wave Section has been revised, and the station listings increased in scope and number. Complete details on the Short-Wave Section appear immediately before that section.

In this issue of *White's Radio Log* we have included the following listings: U.S. and Canadian AM Stations by Frequency, U.S. Television Stations by States, Canadian TV Stations by Location, and the newly expanded Short-Wave Section.

In our next issue, April/May 1964, the *Log* will contain the following listings: U.S. and Canadian AM Stations by Location, U.S. FM Stations by States, Canadian Stations by Location, Mexican and Cuban AM Stations by Location, and the expanded

Short-Wave Section. The short-wave listings will always be completely revised in each issue of *White's Radio Log* to insure 100 per cent up-to-date information leaving nothing to chance.

In the June/July issue of RADIO-TV EXPERIMENTER, the *Log* will contain the following listings: U.S. AM Stations by Call Letters, U.S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, and the expanded Short-Wave Section.

Therefore, in any three consecutive 1964 issues of RADIO-TV EXPERIMENTER, you will have a complete cross-reference listings of *White's Radio Log* that is *always up-to-date*. The three consecutive issues are a complete volume of *White's Radio Log* that offers complete listings with last minute station change data that can not be offered in any other magazine or book. If you are a broadcast band DX'er, FM station logger, like to photograph distant TV test patterns, or tune the short-wave bands, you will find the new *White's Radio Log* format an unbeatable reference.

QUICK REFERENCE INDEX

U.S. and Canadian AM Stations by Frequency	129
U.S. Television Stations by States.....	140
Canadian Television Stations by Location.....	142
World-Wide Short-Wave Stations.....	142

U. S. and Canadian AM Stations by Frequency

U.S. stations listed alphabetically by states within groups, Canadian stations precede U.S. Abbreviations: Kc., frequency in kilocycles; W.P., watt power; d—operates daytime only. Wave length is given in meters.

World-Wide Short-Wave Stations

The World-Wide Short Wave Stations section of *White's Radio Log* is, as its name implies, a *log*, that lists stations actually monitored by listeners in the United States, Canada and overseas. It is *not* intended to be a listing of *all* shortwave transmitters licensed as such listings contain numerous inactive transmitters, and low powered stations which are rarely heard by DX'ers. The stations listed here, therefore, are those most often reported and consistently heard during the past few months. Many have been monitored by DX CENTRAL the official RADIO-TV EXPERIMENTER monitoring post in New York City.

Because of the fact that this log represents actual monitoring reports rather than data

taken from published program schedules received from the stations, you may find that frequencies (and operating times) given here differ from *official* listings. This is because foreign short-wave stations frequently operate several kilocycles away from their assigned (and announced) frequencies. In addition, the schedules of these stations are often changed and the changes are not published in the schedules until many months later. We feel that the type of log which *White's Radio Log* is presenting represents a very realistic picture of the current status of short-wave broadcasting, and is something which cannot be obtained from any other sources.

Let us know. Although you will be able

to hear a great majority of the stations listed here, keep in mind that there will undoubtedly be a number of stations which cannot be heard at your location—just as there will be many stations which you will here which are not in our listing for this issue. We invite you to submit your short-wave broadcast station loggings for inclusion in forthcoming issues. Please be sure to include the following information on each station reported to us: approximate frequency, call sign and/or station name, city and country, time heard. Send this information to: **DX CENTRAL, White's Radio Log, c/o RADIO-TV EXPERIMENTER, 505 Park Avenue, New York, N.Y. 10022, U.S.A.**

For the DX'er. If you care to roam the bands for DX, we present here some information which will be of invaluable use to you in tracking down DX stations.

It should be noted that most short-wave broadcasting stations operate within 9 specific frequency bands, established by international agreement. Each of these bands has a number, corresponding to the average wavelength of the frequencies within the band. The 9 bands are as follows:

- 60-meter band= 4750 kc to 5060 kc
- 49-meter band= 5950 kc to 6200 kc
- 41-meter band= 7100 kc to 7300 kc
- 31-meter band= 9500 kc to 9775 kc
- 25-meter band= 11700 kc to 11975 kc
- 19-meter band= 15100 kc to 15450 kc
- 16-meter band= 17700 kc to 17900 kc
- 13-meter band= 21450 kc to 21750 kc
- 11-meter band= 25600 kc to 26100 kc

Although the current radio propagation conditions have made the high frequency bands (11 and 13 meter bands) relatively poor for DX'ers, the other bands are generally good during certain periods of the year.

As a general rule, the following bands are "hot for DX" during the times and periods indicated:

- 60-meter band= Winter nights.
- 49-meter band= Winter nights.
- 41-meter band= Winter nights.
- 31-meter band= Nights, all year.
- 25-meter band= Nights, all year.
- 19-meter band= Days all year, and Summer nights.
- 16-meter band= Days, all year, and Summer nights.
- 13-meter band= Days, all year.
- 11-meter band= Days, all year.

Time to listen. The times shown in the Short-Wave Section of *White's Radio Log* reflect only the fact that the stations happened to be monitored in one part of the world at a particular time. Since the schedules of these stations probably span several hour's time, you should check a station's frequency several times over a two or three hour period if it is not heard at your location at the time it is listed here. Stations will probably be heard on additional frequencies not listed here (Radio Moscow, for example, operates on about 150 different frequencies).

All times shown here are in the 24-hour EST clock system. For example, 0800 is 8:00 A.M. EST, 1200 is noon EST, 1800 is 6:00 P.M. EST, and so on. For conversion to other time zones, subtract 1 hour for CST (0800 EST is 7:00 A.M. CST), 2 hours for MST, 3 hours for PST.

The following abbreviations are used in *White's Radio Log*: BC—Broadcasting Company, Corporation, or System; E—Emissora; R—Radio or Radiodiffusion; V—Voice or Voz.

Good DX! (And don't forget to report your loggings to DX CENTRAL.)

Lissajous Figure Quiz

(Quiz on page 64)

2:1	3:2	3:1
5:3	5:1	1:1
4:1	4:3	5:2

Lissajous figures should not be a mystery to you. If you never saw them on an oscilloscope, it is high time that you did. Try to dig up two audio signal generators and an oscilloscope on one test bench. The results are worth the effort. ■

"And as the soldering iron started to fall on my wife's new rug, I grabbed for it."
