THE VOICE OF TACOMA

A pioneer in the field of radio broadcasting, KMO, Tacoma is now one of the mainstays of the area. In addition to being Tacoma's only network station, KMO has a local programming that closely knits its activities into a far reaching design that meets the demands of all walks of life.
CARL E. HAYMOND, owner and general manager of KMO is a native of Geneva, Iowa and a graduate of Cornell, Class of '17. Mr. Haymond has continuously been identified with radio since 1918 and has installed and operated many radio stations on the Pacific coast including Alaska's first station at Ketchikan. He is also the owner and manager of KIT at Yakima. He says that his ambition is, "to do a better job of broadcasting." He is married and has a son attending Cal. Tech.
STATION MANAGER

Minnesotan JAMES A. MURPHY has been with KMO for the past fifteen years in the capacity of station manager. "Jim", when he finds a bit of time, does some gardening or takes his two boys hunting or swimming. He is also the station manager of KIT in Yakima.

NATIONAL COMMERCIAL MANAGER

Southerner A. Q. MOORE is in charge of KMO's national advertising accounts. He is a graduate of Georgia Tech and was with the advertising department of two Atlanta newspapers for several years. He is married and in his spare time goes salmon fishing.

LOCAL COMMERCIAL MANAGER

JERRY GEEHAN, manager of local accounts, is a native of Tacoma. He has been actively identified with radio since 1934. Jerry, in addition to his executive duties, handles many popular sports broadcasts and may be heard three times each week on his evening round-up, "Sport-Slants".

... In the present complex Total War, the mission of American Radio is to insure Democracy of survival and the world of a future peace with the security of the "Four Freedoms.

... The task is not simple. Americans insist upon facts and figures. They want to be convinced. Radio, a medium of mass communication, must service a conglomeration of races, creeds, political beliefs and backgrounds which make up the American people. These listeners fortunately can be reduced to a common denominator -- "the patriotic American" -- to be reached effectively in broadcasts ranging from the spot announcements to the national hour-long hook-up.

... No national or local problem, no matter how great or small, is being overlooked. Men have been recruited for our fighting forces, for federal service, war industries and farms; war bonds have been sold into the millions of dollars; rationing, salvage, nutrition, civilian defense, conservation and price control information have been explained.

... Meanwhile, we at home have been linked with our men overseas by an endless stream of broadcasts. And the Axis which cluttered the air with its bitter propaganda aimed at our destruction, is now fighting a defensive war on the international airways as American talent and genius assaults it with high-powered short-wave broadcasts.

... Add to these tasks, the vast network of military radio communication now serving our fighting forces throughout the world and the important function of radio in our war effort is realized. The pictorial coverage on the following pages reveals but a mere fraction of these activities. But this story of American radio fighting voluntarily with every watt of its strength, to insure our nation of victory, reveals the significance of radio to the final outcome of the war. This important contribution is an achievement of Democracy.

YES

American Radio is in the war all the way. It shall not cease fighting until the war is won and a secure peace is assured.
In a Democracy - even at war - there is a limit to the effectiveness of regulations. In most instances, public acceptance must be secured. To reach our large population of 130,000,000, no medium is more effective than radio.

And radio, alert to its vital role in this part of the war effort, is generously contributing its facilities, its time, and its trained personnel to serve the government and our people.

### How Radio Helps

**The Record:**
- U. S. Army
- U. S. Navy

- Conservation of Household Equipment

**REGIONAL**
- Grain Storage
- Reclamation Campaign
- Relief for Farm Labor Shortage
- Promotion of Power Programs
- Promotion of supply of farm products vital to war
- Forest Fire Prevention
- Mine Service

Each local area can add scores of items to this imposing list.
The story of Bataan and Corregidor is truly one of the great epics of our military history. Blockaded and doomed, American and Filipino troops fought side by side against the Invader until their last ounce of energy was consumed. Communications were mainly by radio. Although subject to continuous bombardment, troops sought relief from the pressure of war by listening to short-wave broadcasts. From here, too, came the final heart-breaking radio message announcing the defeat...a message tapped out by a young Signal Corps wireless operator which shocked the American people into a resolve that they would not cease fighting until the Japanese Army is destroyed and victory is ours!

THE LAST MESSAGE

While shells were falling all around, and rifles were being smashed to keep them from the Japanese, 22-year-old Irving Strobing of Brooklyn, with the Army at Corregidor, heroically remained at his radio transmitter, flashing out the series of poignant messages that announced the fall of the island fortress on May 5th, 1942. "They have got us all around and from the skies. From here it looks like firing ceased on both sides. The white flag is up. Everyone is bawling like a baby. . . . .

Before the fall of Bataan, U.S. Soldiers hear short-wave news from home.

The last man to leave Corregidor, Lt. Col. Carlos P. Romulo of the Philippine Army, speaks to a nationwide radio audience.

"Corregidor used to be a nice place"

Mrs. Roosevelt looks on as Surgeon General James Magee pins citations on some of the U. S. Army nurses who escaped from Bataan.
Every able-bodied citizen has a part in the national defense of the United States. Any attack upon this country must find each citizen assigned to his or her place, trained in the duties involved, and resolute to carry out those duties, regardless of the danger to be faced.

Thousands of United States communities have organized and trained efficient Civilian Defense units and have conducted tests, drills and exhibitions to determine that each cog in the vital machinery of wardens, police, firemen, nurses, etc., will be capable of meeting any emergency.

Only with the complete cooperation and support of those whom Civilian Defense is designed to serve and protect, can it operate smoothly and efficiently. You will recognize the Civilian Defense Workers by these insignia.

1. DECONTAMINATION CORPS
2. FIRE WATCHER
3. AUXILIARY POLICE
4. RESCUE SQUAD
5. NURSES’ AIDE CORPS

In cooperation with local patriotic organizations, radio has assumed an active role in enrolling a corps of 500,000 to 600,000 civilian volunteers to serve in the Air Warning Service of the Army Air Corps.

Night and day, these specially-trained men and women stand guard on the roofs of their homes, in the towers of churches and skyscrapers, on prairies, farms and fields and beaches.

They watch for the speck — at night they listen for the hum of a motor — that may be an enemy plane. Their alarm sends into action an amazing organization that enables RADIO to warn the civilian population. Simultaneously, the warning is flashed to industry, home guards, police, fire departments, civilian defense officials.

In case of an actual air raid, your radio station will go off the air so as not to aid in guiding enemy aircraft to their targets, but not until after a calm, concise announcement of the impending danger.

When the "all clear" is sounded, your radio will resume operation.

OUR fighting forces throughout the world are linked to Command Headquarters in Washington by a vast network of military communication. Messages are necessarily sent in code -- for in them are the secrets of our future military operations. Our system of radio stations in the United States has been a reservoir which provided our Army and Navy with thousands of skilled specialists who now maintain our important lines of military radio communication. Meanwhile, the services are training thousands of additional men for radio duty on land, on the sea, and in the air. Today, radio is the nerve system of our military might. Crackling messages over the airways will carry the signal of the last great offensive and the first news of the final defeat of our enemies.

A MILITARY MISSION

On April 5, 1942, the United States Army started a new kind of military operation. For the first time in history, the War Department was directly sponsoring and producing a radio program with a definite military objective -- "The Army Hour". Since then, the official "Army Hour" has established itself as an integral part of the global fight of the United Nations against the Axis.

Through the "Army Hour", which is broadcast each Sunday, America and the whole world is getting a weekly view of the progress of the war and how it is being fought. The program reaches to all parts of the globe to tell the story of the United Nations fight, with buck privates telling their important role as prominently as the top-ranking military chiefs.

When listeners heard the chatter of machine guns, they were hearing live bullets fired by the gun crew in this photo. Radio microphones enabled the listener to hear also, the bullets striking the target.

From the West Point air training field, the Army Hour introduced J. H. Weikert, Captain Donald Thurmar and Cadet Vincente Lim.

Bill Stern, famous sports commentator, describes how it feels to look through a bomb sight and pull the release that will send bombs from U. S. planes to blast the enemy.

Behind the scenes in any Army Hour broadcast is Art Feldman, the man who gives the signals and makes the check-ups on as high as 35 "switches" on a single program. He is in touch with each remote point, foreign or domestic, until each is off the air.

Two Australian fliers, Sgt. John Norman and Sgt. Hilton Greenree, told Army Hour listeners of their experiences in fighting the Japs in the Far East.
A message by Secretary of War Henry Stimson inaugurated the first official War Department radio program.

Lt. Gen. Hugh A. Drum, commander of the First Army, addressed an Army Hour audience. On the same program were: Lt. Generals McNair, Lear, Krueger, and DeWitt.

Instrumental in planning and arranging each War Department program is Lt. Col. E. M. Kirby, Col. Ernest R. DuPuy, Major General A. D. Surles and Col. R. B. Lovett.

WAR INFORMATION

With news, roundtables, speeches, forums, special events and dramatic programs, radio is keeping Americans the most informed people in the world. Today, more than ever before, Americans demand all the facts except those which will give aid and comfort to the enemy. From these truths come American unity and decision. Radio’s task is to bring this information to our people as quickly and as clearly as possible.

They've got more important places to go than you!...
When they are not too busy learning the methods of warfare, the Army, Navy and Marine Corps can present radio programs with a professional flavor, designed to entertain and inform the folks back home. Hundreds of radio entertainers, musicians, writers, announcers, production men and specialists are in the service, and they welcome the opportunity to resume association with their former civilian pursuits. Meanwhile, radio listeners, they make it possible for friends and relatives to visit camps and training stations, without moving away from the loud-speaker. Through this medium, radio can claim special distinction for building and maintaining our strong morale.
West Point Band plays for radio in Cullom Hall.

Each service stripe, worn on the left sleeve below the elbow, indicates completion of a four-year enlistment. After serving 12 years with good conduct, gold stripes are worn. Enlisted men's rating insignia become gold after completing three enlistments with good conduct. Red rating marks are worn on blue uniforms, blue marks are worn on white.

ENLISTED MEN'S SPECIALTY MARKS

CHIEF PETTY OFFICERS AND PETTY OFFICERS
The rating badges are worn on the sleeve between shoulder and elbow. Petty officers, seaman branch, wear rating badges on the right arm, other petty officers wear them on the left arm.

POCKET OR BREAST INSIGNIA
Next to personal mail, a broadcast from the U. S. A. is one of the most important factors affecting the morale of men in the Armed Services. That is why the War Department originated "Command Performance", a radio program as its name implies, mirroring the entertainment requests of Uncle Sam’s fighting men.

Constituting a listener’s dream, so far as talent selection is concerned, Command Performance is not broadcast domestically. Every Sunday, over a 24-hour period, in order to reach military forces at a good listening hour, the program is shortwaved by 18 U. S. international shortwave stations, beamed to points all over the world.

The country’s most famous radio, screen and stage stars appear on the program in answer to the service-men’s requests. Top-flight orchestras add their part to the program, and occasionally the program features novelty requests such as Carole Landis’s sigh, a pet dog’s bark and the songs of Indiana birds.

Two other short-wave programs bring the men in foreign service sports news and special news features and as the foreign personnel expands, many new programs are in the making.
Radio Star Mary Ann Mercer has performed in scores of Army and Navy camps and stations and has sold hundreds of thousands of dollars in War Bonds.

"General" Jimmy Durante broadcasts with clarinet accompaniment.

Red Cross workers with Jack Benny, Edgar Bergen and Charlie McCarthy after a broadcast for Navy Relief.

MORALE BUILDERS

Uncle Sam's fighting men have no group of friends truer than the professional entertainers of radio, stage and screen. Whether it is a radio program, a personal appearance, a war bond drive, a benefit performance or a friendly visit—the entertainment stars are doing an "all-out" job. On this page is a very small sample of the "morale builders" in action.

A Navy officer and an entertainer, Lt. Commander Eddie Peabody and his banjo, heard on many broadcasts.

It's Chico Marx at the piano, Jane Pickens and Mitzi Mayfair entertaining sailors at Trinidad.

Film Star Bette Davis makes a hit with U. S. Navy gobs.

Gayle Mellott draws a lucky number at the Servicemen's Hop.

www.americanradiohistory.com
KEEPING IN TOUCH

Wherever they are, in training or in action, U.S. fighting forces look to radio to maintain their association with “home” — it may be the voice of a friend, word from the home town or news from the good, old U.S.A. It all serves the same purpose for the service men who have no intentions of losing contact with things that were familiar before the war interrupted their lives. Radio does this job, too.
The major radio networks boast dozens of programs covering the war effort from every possible angle. Listeners are free to make a selection from a range of programs that extends from simple entertainment through dramatics, speeches, interviews, special events, educational features, news, discussions and commentaries. Thanks to radio, American listeners are supplied with every iota of war information not helpful to the enemy. The major networks play a leading role in this great public service. Herewith is a limited sample of network war programs.
Don't be discouraged by long delays in receiving replies to your letters to men in Uncle Sam's fighting forces. This is a World Wide War. The seas are wide and rough sailing. Regular mail travels in convoys and there are many unpredictable factors that may unavoidably delay the delivery of mail to men overseas. Be patient.

Don't be discouraged by necessary military restrictions. Write often to your servicemen; write long letters, but, remember, your letter may fall into enemy hands. Don't make it valuable reading for them.

The government considers your mail important—every ship that leaves this country carries mail.

The marines receive an assigned unit number and designation which he sends to the postmaster, either at New York or San Francisco, upon safe arrival overseas. The cards are then mailed to designated friends and relatives, who address mail according to the instructions on the cards.

V-Mail Service is available to and from the personnel of our Armed Forces of certain points outside the continental United States. If a message is addressed to or from a point where V-Mail equipment is not in operation, it will be transmitted in its original form by the most expeditious means of transportation.

V-Mail blanks are available at all post offices.
HOW TO DISPLAY AND RESPECT
THE FLAG OF THE
UNITED STATES OF AMERICA

1.--When flags of states or
cities or pennants of societies
are flown on the same halyard
with the flag of the United
States of America, the latter
should always be at the peak.
When flown from adjacent
staffs the flag of the United
States should be hoisted first
and lowered last.

2.--When displayed with an-
other flag against a wall from
crossed staffs, the Flag of the
United States should be on the
right (the flag's own right),
and its staff should be in front
of the staff of the other flag.

3.--When used on a speaker's
platform, whether indoors or
out, the flag should never be
reduced to the role of a mere
decoration by being tied into
knots or draped over the
stand. For this purpose bunt-
ing should be used. The flag,
if displayed, should be either
on a staff or secured to the
wall or back curtain behind
the speaker with the union to
the flag's right.

4.--When flags of two or more
nations are displayed together
they should be flown from
separate staffs of the same
height and the flags should be
of approximately equal size.

5.--When the flag is displayed
in the body of the church, it
should be from a staff placed
in the position of honor at the
congregation's right as they
face the clergyman. The ser-
tice flag, the state flag or
other flags should be at the
left of the congregation. If in
the chancel or on the platform,
the flag of the United States
should be placed on the clerg-
man's right as he faces the
congregation and the other
flags at his left.

6.--When the flag is displayed
in a manner other than by be-
ing flown from a staff, it
should be displayed flat,
whether indoors or out. When
displayed either horizontally
or vertically against a wall,
the union should be upper
most and to the flag's own
right, that is, to the observer's left.

7.--Whenever a number of
flags of states or cities or
pennants of societies are to
be arranged in a group and
displayed from staffs with the
flag of the United States, the
latter should be placed at the
center of that group and on a
staff slightly higher than any
of the others.

8.--When the flag is displayed
from a staff projecting hori-
zontally or at an angle from
the window sill, balcony or
front of a building, the union
of the flag should go to the
peak of the staff (unless the
flag is to be displayed at half-
staff).

9.--Whenever the flag of the
United States is carried in a
procession in company with
other flags, it should occupy
a position in front of the cen-
ter of the line of flags or on
the right of the marching line.
PUBLIC SERVICE

The U.S. Department of Interior produces a radio program "Man Is A Grant," telling the story of Boulder Dam and its significance in the war effort. This series of photos shows the cast in action, a close-up and the sound-effects man. Actors are professionals, called in for each program.

Inter-American University On the Air. Above—Dr. Guy E. Snively, Association of American Colleges; Dean Virginia Gildersleeve, Barnard College, Columbia University and Mr. Edwin Hughes, National Music Council. Below—left to right, Dr. Willard E. Givens, National Education Association; Rev. Dr. George Johnson, National Catholic Welfare Conference; Neville Miller, National Association of Broadcasters.

Posing after a broadcast promoting the sale of War Bonds, left to right, William Green, T. C. Cashen, Secretary of the Treasury, Henry Morgenthau, Jr., Lt. Commander Edward O'Hara, Secretary of Agriculture Claude Wickard and John W. O'Leary.

Women's Part in the War, discussed by (left to right) Mrs. Henry Morgenthau, Jr.; Mrs. Philip Jones, farm wife of Shelton, Conn.; Mrs. Jeannette Simpson, Baltimore aircraft worker; Miss Luise Rainer, actress; Mrs. Edna Woolman Chase, editor of Vogue magazine; Miss Jan Struther, author and Mrs. Clarence E. Hewitt, wife of Detroit tank arsenal employee.
Keeping pace with the expanding needs of the vast war effort has been the solemn obligation of the American Red Cross. Again radio is doing its part to aid this great organization of mercy in its many vital endeavors, such as fund campaigns, blood banks, nurses' training, and many others. These photos show some of the Red Cross leaders, workers and friends as they appeared in radio broadcasts.
