

RM

Permeability Tuned I.F. Transformer

TYPE I.F.T. 67.

**PRICE 8/9 EACH
Supplied in Cartons**

The I.F.T.67 is a new development inasmuch as it is the same size as a standard electrolytic condenser, being 1 3/8" diameter x 2 1/4" high. It is secured to the chassis with the same type clip.

With a minimum Q of 90 in can, it is ideal for modern receivers.

Send for full particulars.

5,000 S/W STATIONS

In a letter recently received by us from Mr. H. R. Lodge, of Worthing, Sussex, he says—

"With further reference to the S/W list of Stations heard on my ONE Valve Receiver using your TYPE 'A' Headphones, I have pleasure in reporting that I have now listed 5,000 S/W Stations mostly 40 and 20 metres with a few on 10 metres, with 130 Territories represented.

"Among the 6 Stations recorded were four working on low power. Henley-on-Thames ONE watt. Falmouth 3 watts, Lincs 5 watts, and S. Wales 8 watts.

"Am now out for ten thousand! but each additional thousand now is hard work! But, careful listening with these sensitive headphones should eventually secure the target.

"Yours sincerely,
H. R. Lodge."

The famous S. G. Brown Type "A" Headphones give highest possible efficiency; this is attained by the Adjustable Reed Movement which replaces the usual flat diaphragm.
